

Brew Tea Co

Project

Brew Tea Co

Project

Opportunity

Brew Tea Co is an independent Manchester based company focusing on premium tea. They make awesome tea with rolled, whole leaves and supply proper brews to 16 countries all over the world.

Now five years old, Brew Tea Co have grown dramatically in size with eight times more people than when they first started. The rapid business growth has meant that Brew Tea Co were quickly outgrowing their office space and needed some smart thinking to adapt the space to meet their business needs without relocating.

Connection furniture was specified to create breakout, training and office spaces to help maximise the way the Brew Tea Co team operate within the existing space.

Brew Tea Co

Project

Solution

Bold and bright furniture pieces were specified to create a vibrant and energised scheme, designed to complement the Brew Tea Co branding and business ethos.

Within the main office space, poseur height **Centro** tables with Swoosh bar stools and high back statement **Hygge** chairs were specified to allow informal meetings and touchdown areas for staff to break away from their desks.

Freestanding **Rooms** were installed within the main warehouse to create two new office and meeting spaces. Acoustic baffles were added to soften noise reverberation and glass walls to create a connected feeling to the rest of the space.

Critical to the whole space was the installation of a Brew Station and Tea Training area to encourage collaboration, knowledge sharing and creativity. Poseur height **Tubes** tables and stools, as well as **Swoosh** bar stools, were used to define this zone and add vibrancy to the main warehouse space.
